Rohit Chintalapudi

Kondapalle, Andhra Pradesh — rohit.chintalapudi.work@gmail.com — +91 7993390572
Portfolio — LinkedIn — GitHub — LeetCode — CodeChef

Professional Summary

Aspiring Software Development Engineer with foundational expertise in Machine Learning and Full-Stack development. Skilled in building predictive models, data preprocessing, and MERN stack applications. Strong problem solver with 340+ LeetCode problems solved and a 3-Star CodeChef rating.

Education

SRM University AP *2024 – 2028*
B.Tech in Computer Science and Engineering CGPA: 9.65 / 10.0
SR Junior College *2022 – 2024*
Intermediate Percentage: 97.9%

Technical Skills

Languages: C, C++, JavaScript, Python
Machine Learning: NumPy, Pandas, Scikit-Learn, Matplotlib, Seaborn, Data Preprocessing, Model Evaluation
Full-Stack: HTML, CSS, React.js, Tailwind CSS, Node.js, Express.js, REST APIs, WebSockets, MongoDB, MySQL
Tools & Concepts: Git, GitHub, Postman, Jupyter Notebook, OOPs, DBMS, Authentication, Cloud Deployment

Experience

Software Development Intern – NighaTech Global Pvt. Ltd. *May 2026 – Present*
- Collaborating on full-stack web applications using modern frontend and backend environments.
- Developing and debugging scalable features, production REST APIs, and database solutions.
- Utilizing git-based version control systems for team-wide collaboration and efficient deployments.

Projects

Predictive Housing Analytics Engine
Python, Scikit-Learn, Pandas, NumPy, Matplotlib, Jupyter Notebook
- Developed a regression model to predict real estate pricing using exploratory data analysis (EDA).
- Built pipelines to handle missing values, eliminate outliers, and apply one-hot encoding to categorical features.
- Optimized prediction accuracy across Linear Regression and Random Forest models using MSE evaluation.

Customer Churn Prediction Pipeline
Python, Scikit-Learn, Pandas, Seaborn, Flask
- Engineered an end-to-end classification pipeline to detect consumer churn risks within enterprise datasets.
- Handled data class imbalance using sampling methodologies and implemented feature scaling.
- Deployed a lightweight Flask API utility to expose predictions as usable real-time churn scores.

Chatly – Real-Time Chat Application
React.js, Node.js, Express.js, MongoDB, Socket.io
- Developed a full-stack real-time web application supporting messaging persistence and instant notifications.
- Implemented stateless JWT user authentication and robust password encryption mechanisms using bcrypt.

Achievements & Coding Profiles

- **Coding Profiles:** Solved 340+ problems on LeetCode and secured a 3-Star rating on CodeChef.
- **Hackathons:** Ranked in the Top 45 out of 422 teams in the SIH Internal Hackathon
- **Certifications:** Successfully completed industry-relevant professional certifications in Web Development and AI-Driven Android App Development.
- **Academic Excellence:** Maintained a top-tier academic standing with a 9.65/10.0 CGPA in Computer Science Engineering.
